Mulberry Square
C/O Association Management, Inc.
47200 Van Dyke Ave.
Shelby Twp., MI 48317

To all Members of the Board,

All treatments done at Mulberry Square and all of our properties, both commercial and residential, are done with complete concern for the environment. First and foremost, chemicals used are now regulated, not like in years past.

Chemicals are applied directly to the lawn, trees, and/or shrubs being treated. There is very little over-spray or run-off of material. After treatment of trees and shrubs, the area is usually completely dry within one hour and safe for animals and kids to play on. As far as lawn treatments, when only granular is applied, it is immediately safe to be on. When liquid weed control is applied, it should be given 2 – 4 hours too completely dry, then it is safe to be on.

We inform the management company two days prior to any treatment being done. This way, it gives them time to post notice for the residents.

We only want to maintain the natural beauty of the property at Mulberry Square. It is not our character to cause harm to pets, children, the environment, etc. We want you to be able to enjoy the beauty of a lush green lawn. We want your landscape to retain its' beauty by keeping its foliage into the fall. We only want to address the insects and diseases that will cause foliage to skeletonize, early leaf drop, unsightly black spots on the leaves, etc. The material we use is targeted to treat only the diseases/insects that will cause these problems. In the early spring we use a refined oil that suffocates/smothers over-wintering egg masses.

We look forward to continuing to work with Mulberry Square. It is our pleasure to help make it possible for you to enjoy the beauty of your landscape.

If you have any questions or concerns, please don't hesitate to call.

Sincerely,
GREENTREES, INC.

Debbie Courtney
Office Manager
